WEETALABAH PERFECT COMBINATION

RIGHT COMBINATION

THE BOXER

WEETALABAH LUMBERJACK

MICKEY MOUSE NEPTUNE

HISTORY

Weetalabah is run by Aderian and Julie Nixon at Dulacca, QLD. Bulls are rotated between being fed by hand and in self feeders. They are fed a light ration and adlib grass hay to guarantee they will last a lifetime for their new owners. The cows are run on native and improved pastures, with protein licks only and the calves are never creep fed. We stand behind our cattle and we fully guarantee are bulls will work for you.

Weetalabah started breeding Gelbvieh in 1998 with the purchase of SJ Willy R21 from Steve Sullivans dispersal sale. The Ultra Violet, Cup Cake, Shady Lady Line and the last of Clyde Johnson's Lady in Red have been added to the herd over the years. Sarsha, Dina and Destiny's Day line added from Glendale Stud in WA in 2008, after a visit in 2007. Glenisa Princess was added in 2008 from the windup of the Glenisa Gelbvieh herd. Females from these amazing lines have been kept over the years with the occasional female being sold privately. This will be a rare opportunity to grab some elite females from the top of the Weetalabah Herd.

Over the years bulls have been sourced from Midas, Norolle and through the use of AI. The AI bulls have made a massive impact on the herd, the most notable being the 2-time Canadian National Champion RWG Right Combination 5503.

Some of his sons have been kept and used over the females, with many sons and grandsons available in this sale.

Mickey Mouse was started in 2015 by Aleacea Nixon, after being given a few females from her parents. They go back to the great Willy, Sarsha and Princess females from Weetalabah. The highlight for Aleacea has been having the Junior Champion and Grand Champion Bull, reserve senior bull and reserve junior bull at Ekka in 2018. Aleacea is still building up her herd and will have 1 young bull in this sale. The Mickey Mouse herd is run completely with the Weetalabah herd and are treated exactly the same.

Kevlor Gelbvieh was started after Annie Minehan fell in love with Gelbvieh cattle, when working for Aderian and Julie during work experience. They gave her a female to start her own stud in 2014 and after a few years and hard work, she was able to purchase a few females from some of the top studs in Australia to create her baseline of cows. Along with Aderian and Julie semen from the outstanding Canadian Bull, RWG Right Combination was purchased and has been a game changer in the Kevlor breeding program. Consisting of approx 20 head the cattle are run alongside the Weetalabah Herd, fed the same, bred the same and perform the same. Kevlor is pleased to have 4 bulls available in this sale.

Calveston owned by Tracie and Michael Borg, where they run a large grazing and cropping property at 'Calveston', North of Clermont, QLD. They were introduced to the breed 22 years ago, when they purchased their first bull, and they joined him to their cows with other Brahman bulls. They were then so surprised to have lots of offspring and were very happy with the temperament and the quality and growth in the calves that they have had Gelbvieh ever since!!! The Borg's find the Gelbvieh cross calves have very quick growth rates, and easily make bullocks with milk teeth dressing at 300-350kg. The Borg's have also observed that the Gelbvieh Bulls they have used have a very strong Poll Gene.

Most of their Brahman herd is horned, however they are finding they are still getting 80% poll calves. They keep a very select lot of heifers and they make lovely breeders, maturing very quickly, are very fertile and produce lots of milk. They prefer to have any amount of Gelbvieh in their females, their philosophy "is that it is better to have a little Gelbvieh than no Gelbvieh!" The Borg's also have a small purebred self-replacing herd that they run at their other property at Maclagan, near Dalby, where they are run on Buffel grass hills and then the bulls are transported to Calveston as weaners to grow out. They will have 9 purebred and 3 Gelbvieh Brahman bulls in the sale. All bulls are raised and fed in Central Queensland. Ready to go to work.

LOT 1

1 UNREGISTERED WEETALABAH S231 WBHBS231

DOB: 11/08/2021 **HORN:** HETRO POLLED **COLOUR:** BLACK
50% GELBVIEWH 50% ANGUS

SIRE: NEIGHBOURS UNREGISTERED ANGUS BULL

DAM: WEETALABAH PRINCESS F017
 GLENISA PRINCESS X088

NOTES

Although not a lot is known of his pedigree, he was certainly too good to cut as a calf, he has to be seen to be believed. He has that extra length and body and so much sire appeal. He is just over 2 years of age and an exceptional young bull that will work over any breed. 35kg birthweight

BUYER \$

LOT 2

2 WEETALABAH STYLUS S230 WBHPS230

 WEETALABAH ULTRA VIOLET E017

RWG RIGHT COMBINATION 5506
DAM: WEETALABAH ULTRA COMBINATION P227
 WEETALABAH ULTRA VIOLET G016

NOTES

Out of a first calf heifer and a real gem. His mother is the first daughter of Right Combination to calve at Weetalabah, and we could not be more impressed. He is by our own bull Lumberjack and a real powerhouse. Only an August born calf, extremely quiet and well worth a good look at. 43kg birthweight. Extremely fertile, highest semen count per ml our vet had ever seen. Used over heifers with no problems.

DNA PENDING

NOTES

The first of the young guns. This is an exceptional young bull with loads of spunk and softness. He was the calf on the Grand Champion Cow at Ekka 2022 and the 2023 Junior Champion Bull. He is by the new home bred sire Q Ball who is breeding well over the Right Combination daughters. Dam is a first calf heifer. Standing on tremendous bone, with huge sire appeal, he is an early maturing bull with exceptional SC size, 45cm at only 13months old!!!!. Quiet is an understatement, he is a real softy. A bit larger birthweight at 52kg Birthweight but out of a heifer, however we would recommend using him over cows to be safe.

BUYER **\$**

WEETALABAH FEMALES

THREE STYLISH FEMALES

TAKE YOUR PICK OR TAKE THE PEN

When we decided to have this sale we thought we should also offer some very elite females, from the very top of the herd. A decision that we may be regretting one day, as these 3 females are exceptional!

They are all sired by sons of RWG Right Combination, who has sons in the sale and is the 2 time Canadian National Champion Bull. A bull that has been used around the world and has been one of the most influential bulls in the Gelbvieh Breed in modern times

The Ultra Violet line and Willy line need no introduction, both being Weetalabah foundation females and have both made a massive impact in all the herds that they have gone into. They have been left empty ready for the purchaser to join, to the bull of their choice, however our recommendation would be lot 9, as he has some of the best of the Canadian genetics and a complete outcross to these females. So whether you want them for the paddock or ready for the showing these girls are quiet and ready to go. DNA pending.

LOT 33

HISTORY OF THE SALE

Early 2021 with the quality of the cattle we all had to offer, we decided to have our own sale with the help of Michael and Tracie Borg, our daughter Aleacea Nixon, and Annie Minehan. All bulls on offer have Weetalabah genetics and we stand behind our cattle.

The *Golden Advantage Sale* was born.

"Golden" means Gold in Germany, Clermont is known as the city of Gold.

"Advantage" means with adding Gelbvieh to your herd you will be gaining an advantage.

Cows that milk = calves that thrive = Gelbvieh Advantage.

Gelbvieh mothers are renowned around the world as the best mothers in the Beef Industry, and the quiet European alternative.

From all the vendors, a huge

THANK YOU

to all that have purchased today.

"I've had the pleasure of working with the Nixon's Gelbvieh cattle over the past 6 years on a veterinary capacity. I'm continually impressed by their exceptionally docile temperament, ease of calving and great mothering abilities. The bulls have proved to be high performers with superb results demonstrated during crush side semen evaluations, morphology analysis and quantity of samples making them very easy to collect for freezing. These Gelbvieh's have proved to be early maturing cattle demonstrating excellent weight gains, feed efficiency and impeccable fertility. These animals are outstanding performers in all aspects making them an exceptional line of cattle in my opinion."
