2026 Annual Production Sale Welcome

Dear Valued Bull Buyers,

Welcome to the 2026 Yulgilbar Pastoral Company Annual Production Sale.

It is once again a pleasure to welcome both our long-standing clients and those joining us for the first time. Your continued confidence in Yulgilbar genetics is something we never take for granted, and we sincerely thank you for your ongoing support.

Every year presents its own opportunities and challenges, and the past twelve months have been no exception. Through changing seasonal conditions and evolving market dynamics, our focus has remained firmly on breeding structurally sound, fertile and productive cattle that perform under commercial Australian conditions. We believe this year's offering continues that tradition, representing generations of careful selection and a steadfast commitment to continuous genetic improvement. Following Yulgilbar's acquisition of the herd from Hardigreen Park Stud in 2025, we are particularly excited by the early results of the integration of Hardigreen Park's consistent, high-performing genetics into the Yulgilbar fold.

The cattle presented in this catalogue reflect the depth of our breeding programme and the strength of sire lines that have been developed and refined over many decades. We remain committed to producing bulls that offer commercial producers the combination of performance, fertility, temperament and longevity that has become synonymous with the Yulgilbar name.

As we celebrate more than seventy years since the establishment of the Yulgilbar Santa Gertrudis Stud by my late father, Samuel Hordern, we are reminded of the enduring values upon which the stud was founded: integrity, innovation and an unwavering commitment to quality. It is immensely rewarding to see those principles continue under the stewardship of the next generation of our family.

Our sincere thanks go to Brett and Lucy Ellem and the entire Yulgilbar team for their professionalism, dedication and hard work throughout the year. Their care for the cattle and commitment to excellence ensure that Yulgilbar continues to build on its proud reputation as one of Australia's leading Santa Gertrudis studs.

On behalf of Sidney Myer, Rupert Myer, Samantha Baillieu and our families, we extend a warm welcome to you all. Whether you are joining us in person or participating online, we hope you enjoy the sale and wish you every success in selecting cattle that will make a lasting contribution to your breeding programme.

We look forward to welcoming you to Yulgilbar and thank you for being part of another chapter in our story.

Warm regards,

Sarah Myer, Sidney Myer, Rupert Myer, Samantha Baillieu and our families

Sale information

GUARANTEE

All stud stock are guaranteed breeders. Any claim against the breeding ability of any animal should be made in writing and accompanied by a veterinary certificate within 6 months of sale. In the event of an animal failing to breed, it may be either replaced with an animal of comparable value or credit to the purchase price will be given at the following sale or on a private sale animal.

All lots sell as EU Accredited

Vendor rebate – The vendors agree to pay:

STUD CATTLE

- 3% rebate to outside agents who
 - Introduce buyers in writing at least 24 hours prior to the sale.
 - Accompany client to the sale.
- **No rebate will be paid outside these conditions (strictly enforced).**

Delivery of sale cattle will be given from Monday 7th September 2026. No verbal instructions will be accepted and no cattle are to be loaded without approval of Brett Ellem or the delivery agent (George and Fuhrmann). Please fill out the delivery form at the back of the catalogue.

HEALTH

- Yulgilbar Station is an accredited TB and Brucellosis free herd.
- Stock from Yulgilbar Station (Broadwater Sales Complex) will be free to move.
- Yulgilbar Station is currently rated Johnnes JBAS 7 in NSW and has completed Bio security plans which can be viewed on request on sale day.

VACCINATION PROGRAM

All stud cattle will have been vaccinated for:

- | | |
|--------------------|---|
| - Botulism | - All cattle have been treated with |
| - 3 day sickness | Dectomax V and Flukecare C. |
| - 7-1 | - Pestivirus and tested negative for |
| - Bulls for vibrio | Persistently Infected (P.I.) animals |
| - 3 germ | - Treated with Rhinogard and Bioishield |

To maintain ongoing immunity, it is recommended that you vaccinate your purchases with an annual booster shot in June each year.

Yulgilbar Airport

Baryulgil airfield is a private non licensed airfield located on Yulgilbar Station at Baryulgil NSW. The Airfield is fenced; located in a Cattle Paddock, the surface is sealed, the direction is approximately 150/330 degrees, and there is an uphill rise to the South East of approximately 20 meters over the 1600 metre length of the Airfield.

Elevation is approximately 450 AMSL.

Position: S29.13.3 E152.37.5.

- Please contact the station prior to landing (24 hours notice) so arrangements can be made to meet planes on arrival and transport passengers to the sale.
- A number of motels are located in Tenterfield, Casino, Lismore and Grafton (prior booking recommended)
- Travel time by car to Yulgilbar Station (Broadwater Sales Complex)
- Casino – 1 hour
- Tenterfield – 1hour 30 minutes
- Grafton –1 hour 15 minutes

Yulgilbar Station (since 1840)

Celebrating 185 years Pastoral Settlement

Yulgilbar Station was founded in 1840 by Edward Ogilvie as a 200 000 acre sheep station. The run selected comprised the most fertile region of the Clarence River valley; in North Eastern New South Wales encompassing over 80 kilometers of the river. The property was owned by the Ogilvie family until being sold in 1926 to a syndicate of the Morrissey brothers and silent partner Tom Baillieu.

Sam Hordern was subsequently invited to join the syndicate, ultimately purchasing Yulgilbar in its entirety in 1949. Sam was a foundation director of King Ranch Australia and the first President of the Santa Gertrudis Australia Association.

Sam Hordern's daughter, Sarah and husband, Baillieu Myer, inherited Yulgilbar upon Sam's untimely death in 1960. Today the property still remains under ownership of Sarah and Baillieu Myer.

What's in a name:

Yulgilbar means 'Place of many (or little) fishes.'

Yulgilbar is a heritage listed property of natural beauty and of environmental significance.

Yulgilbar contains much historical infrastructure, dating back to 1840. The station is also characterized by its impressive permanent water systems. Yulgilbar was proclaimed a Flora and Fauna reserve in 1971.

Farming: 4500 acres is currently farmed, growing summer and winter cash and fodder crops, supplying the feed requirements of the Station as well as running a significant Hay and Fodder sales business thru "Toooloonki Division".

A herd of 5000 Santa Gertrudis cattle are now run on Yulgilbar. Yulgilbar weaner's have long been renowned for their constitution and doing ability and, in particular, their ability to gain weight under favorable conditions. These steers have sold previously from Victoria to central Queensland with excellent results.

The first Santa Gertrudis bulls were introduced to Yulgilbar Station in 1953 over Durham Shorthorn type cattle with a Devon influence. 16 King Ranch bulls dominated the early history of Yulgilbar.

Other notable sires in the early history of Yulgilbar included bulls from Bolinda vale, sister stud – Elgee Park, Robenlea, Murrumbo, Yarrowonga, Winderadeen, Rosevale, and The Lakes. These bulls all contributed to the development of the stud, along with numerous Station bred sires. Recognized cow lines in the Yulgilbar herd included the "Gold" family going back to a "Glen Prairie" cow (Kirkby family).

A major expansion of the stud has evolved over the last 10 years. 500 Stud females are currently single sire mated to elite Poll Santa Gertrudis sires.

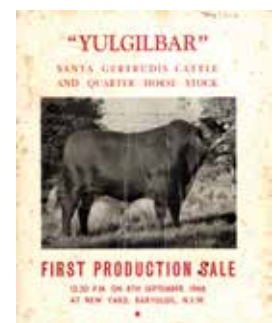

Since 2002, 80 outside bred additional stud sires have been introduced to the Yulgilbar gene pool. A significant addition to Yulgilbar genetics eventuated in 2008 with the landmark purchase of "The Lakes" Santa Gertrudis stud (owned by the Bolster family). The female portion of this widely recognized and established stud were purchased; marking the merger of these 2 major stud operations. Yulgilbar now stands as the largest Santa Gertrudis stud cattle operation in NSW.

Significant AI programs are also conducted utilizing the best available genetics. An Australian record at auction (\$80 000) was paid in 2007 for Warenda Sahara (poll). This record stood until 2015.

Waco Queenslander (P) was purchased for the then record price in 2021 \$110,000 while the Australian semen rights were purchased in the \$197,000 (AUD) record breaking American Santa Gertrudis bull - Red Doc Never Better (P).

Murgona Nightcap N43 (P) was recently purchased for \$105k from the Murgona stud at the Heart land sale in Roma 2021.

The newest addition added to the sire battery is Cardona West Germany, purchased for \$100,000 from Cardona Santa Gertrudis, Blackwater QLD.

Yulgilbar Santa Gertrudis Stud History

The Station and Stud were managed for many years by the Rogan family. Allan Rogan was manager of Yulgilbar from 1964 - 1987. He was largely responsible for the early success of the stud. The first annual production sale at Yulgilbar was conducted in September 1966.

These annual production sales continued until the beef crash in 1974. These sales comprised the sale of bulls, females, steers and significant numbers of Quarter Horse. Post 1974 Yulgilbar sold on a regular basis at the Summer-land Santa Gertrudis sale in Casino.

Sam Hordern, King Ranch, and others were also responsible for introducing Quarter Horses to Australia. Today Yulgilbar Quarter Horse stud is run from Elgee Park on the Mornington Peninsula in Victoria.

Peter Rogan managed Yulgilbar from 1988-1996. Gail and Blythe Richie managed Yulgilbar from 1996-2001. Rob and Lorraine Sinnamon 2002 to 2021.

And currently under the management of Brett and Lucy Ellem.

Yulgilbar believe many breeds of cattle can benefit from the introduction of hybrid vigor through the use of Santa Gertrudis sires. To this end Yulgilbar also breed a number of Santa cows to Angus, Hereford and Charolais to demonstrate the benefit of crossbreeding with Santa Gertrudis.

In recent times Yulgilbar has moved to the vertical integration of a significant portion of its product.

YULGILBAR STAFF

Yulgilbar Station is fortunate to have an excellent team responsible for the management of the operation. Thank you for the contribution made by all these people.

Yulgilbar has paddock sale bulls available year round.

Brett, Lucy, Hunter, Jewel and Dusty Ellem.

Cattle Selection and Santa Gertrudis Breedplan

CATTLE SELECTION

Yulgilbar advocates balanced assessment criteria for cattle selection. This combines visual appraisal for structural soundness, temperament and overall conformation; prudent use of raw measurement data - e.g. frame score, weight, daily weight gain, actual scrotal measurements, eye muscle area and fat scans. Selection of extremes should always be treated with caution. Yulgilbar supports the Santa Gertrudis classification system. Santa Gertrudis group breed plan provides estimates of breeding values that are also of assistance in making choices. Single trait selection for any characteristic is believed to be dangerous and lacks balance in any breeding program.

Use of a combination of the many available "tools" for selection in the industry today is valuable and allows the discerning cattle person to be far more informed about their livestock selections than previously before.

Yulgilbar now for a number of years has been utilising Parent Verification through DNA to ensure integrity in the data we provide. We are also excited that now with genomic enhanced EBV data being incorporated in Santa Gertrudis breedplan, more information will be available to the industry in assisting to make informed breeding decisions. We look forward to further utilising this data as its accuracies grow.

- This Year's Sale Bulls have been tested for the Horn Poll Test (developed by Beef CRC and commercialised by Pfizer). Results will be available on sale day and on our web site once available.
- Santa Gertrudis Group Breedplan figures supplied are July 2026 group run.

FERTILITY

- All females, stud and commercial are pregnancy tested annually and all empty females are fattened and sold for slaughter
- Sale bulls are semen tested and soundness evaluated
- Sale bulls have been morphology tested
- Sale bulls are tested negative for Persistently Infected carriers of Pesti-Virus
- Herd sires are semen tested annually.

HornPoll

Understanding the EBVs, Selection Indexes and Accuracy.

EBVS

An animal's breeding value is its genetic merit, half of which will be passed on to its progeny. While we will never know the exact breeding value, for performance traits it is possible to make good estimates. These estimates are called Estimated Breeding Values (EBVs).

In the calculation of EBVs, the performance of individual animals within a contemporary group is directly compared to the average of other animals in that group. A contemporary group consists of animals of the same sex and age class within a herd, run under the same management conditions and treated equally. Indirect comparisons are made between animals reared in different contemporary groups, through the use of pedigree links between the groups.

EBVs are expressed in the units of measurement for each particular trait. They are shown as +ive or -ive differences between an individual animal's genetics difference and the genetic base to which the animal is compared. For example, a bull with an EBV of +50 kg for 600-Day Weight is estimated to have genetic merit 50 kg above the breed base of 0 kg. Since the breed base is set to an historical benchmark, the average EBVs of animals in each year drop has changed over time as a result of genetic progress within the breed.

The absolute value of any EBV is not critical, but rather the differences in EBVs between animals. Particular animals should be viewed as being "above or below breed average" for a particular trait.

Whilst EBVs provide the best basis for the comparison of the genetic merit of animals reared in different environments and management conditions, they can only be used to compare animals analysed within the same analysis. Consequently, Santa Gertrudis BREEDPLAN EBVs cannot be validly compared with EBVs for any other breed.

EBVs are published for a range of traits covering fertility, calving ease, milking ability, growth, and carcass merit. When using EBVs to assist in selection decisions it is important to achieve a balance between the different groups of traits and to place emphasis on those traits that are important to the particular herd, markets and environment.

One of the advantages of having a comprehensive range of EBVs is that it is possible to avoid extremes in particular traits and select for animals with balanced overall performance.

BIRTH WEIGHT EBV (KG)

is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

200-DAY GROWTH EBV (KG)

is calculated from the weight of progeny taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400-DAY WEIGHT EBV (KG)

is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600-DAY WEIGHT EBV (KG)

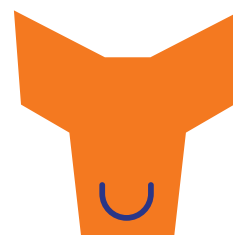

is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

MATURE COW WEIGHT EBV (KG)

is based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age. This EBV is an estimate of the genetic difference in cow weight at 5 years of age and is an indicator of growth at later ages and potential feed maintenance requirements of the females in the breeding herd. Steer breeders wishing to grow animals out to a larger weight may also use the Mature Cow Weight EBV.

MILK EBV

(kg) is an estimate of an animal's milking ability. For sires, this EBV indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weights of her calves. For dams, it indicates her milking ability.

SCROTAL SIZE EBV (CM)

is calculated from the circumference of the scrotum taken between 300 and 700 days of age and adjusted to 400 days of age. This EBV is an estimate of an animal's genetic merit for scrotal size. There is also a small negative correlation with age of puberty in female progeny and therefore selection for increased scrotal size will result in reduced age at calving of female progeny.

CARCASE WEIGHT EBV (KG)

is based on abattoir carcass records and is an indicator of the genetic differences in carcass weight at the standard age of 650 days.

EYE MUSCLE AREA EBV (SQ CM)

is calculated from measurements from live animal ultrasound scans and from abattoir carcass data, adjusted to a standard 300 kg carcass. This EBV estimates genetic differences in eye muscle area at the 12/13th rib site of a 300 kg dressed carcass.

More positive EBVs indicate better muscling on animals. Sires with relatively higher Eye Muscle Area EBVs are expected to produce better muscled and higher percentage yielding progeny at the same carcass weight than will sires with lower Eye Muscle Area EBVs.

RIB FAT AND RUMP FAT EBVS (MM)

are calculated from measurements of subcutaneous fat depth at the 12/13 rib site and the P8 rump site (from live animal ultrasound scans and from abattoir carcasses) and are adjusted to a standard 300 kg carcass. These EBVs are indicators of the genetic differences in fat distribution on a standard 300 kg carcass.

Sires with low, or negative, fat EBVs are expected to produce leaner progeny at any particular carcass weight than will sires with higher EBVs.

RETAIL BEEF YIELD EBV (%)

indicates genetic differences between animals for retail yield percentage in a standard 300 kg carcass. Sires with larger EBVs are expected to produce progeny with higher yielding carcasses.

INTRAMUSCULAR FAT EBV (%)

is an estimate of the genetic difference in the percentage of intramuscular fat (marbling) at the 12/13th rib site in a 300 kg carcass. Depending on market targets, larger more positive values are generally more favourable.

SELECTION INDEXES

Santa Gertrudis selection indexes are calculated for two market specifications, namely, Domestic and Export. These Indexes relate to typical commercial herds targeting these specifications.

Indexes are reported as an EBV, in units of relative earning capacity (\$'s) for a given market. They reflect both the short-term profit generated by a sire through the sale of his progeny, and the long-term profit generated by his daughters in a sustainable cow herd, if a proportion of heifers are retained for breeding.

The Indexes are derived using Breed Object technology. More information on this technology is available from the Breed Object web site.

DOMESTIC PRODUCTION INDEX (\$)

Estimates the genetic differences between animals in net profitability per cow joined for an example self replacing commercial herd (run in a temperate environment) producing steers for the Domestic trade. This Index assumes that the steer progeny are pasture grown and finished and marketed at 500 kg live weight (280 kg HSCW and 12 mm P8 fat depth) at 16 months of age. Daughters are retained for breeding. More information is available on the EBV weightings for the Domestic Production Index.

EXPORT PRODUCTION INDEX (\$)

Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd (run in a sub-tropical environment) producing steers for the Export trade. This Index assumes that the steer progeny are pasture grown and finished and are marketed at 620 kg live weight (340 kg HSCW and 15 mm P8 fat depth) at 28 months of age. Daughters are retained for breeding. More information is available on the EBV weightings for the Export Production Index.

Note that \$Index Values for individual animals are sensitive to the assumptions used in the BreedObject analysis to calculate the relevant selection index.

Santa Gertrudis Breedplan

ACCURACY

Accuracy (%) is based on the amount of performance information available on the animal and its close relatives - particularly the number of progeny analysed. Accuracy is also based on the heritability of the trait and the genetic correlations with other recorded traits. Hence accuracy indicates the "confidence level" of the EBV. The higher the accuracy value the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives. Even though an EBV with a low accuracy may change in the future, it is still the best estimate of an animal's genetic merit for that trait. As more information becomes available, an EBV is just as likely to increase in value, as it is to decrease.

Accuracy values range from 0-99%. The following guide is given for interpreting accuracy:

ACCURACY RANGE	INTERPRETATION
LESS THAN 50%	Low accuracy. EBVs are preliminary and could change substantially as more performance information becomes available.
50 - 74%	Medium accuracy, usually based on the animal's own records and pedigree.
75 - 90%	Medium-high accuracy. Some progeny information included. EBVs may change with addition of more progeny data.
MORE THAN 90%	High accuracy estimate of the animal's true breeding value.

As a rule, animals should be compared on EBVs regardless of accuracy. However, where two animals have similar EBVs the one with higher accuracy could be the safer choice, assuming other factors are equal.

For further information please contact Tropical Beef Technology Services or Santa Gertrudis BREEDPLAN

Steps To Register

Using your chosen device visit www.stocklive.com.au.

Click **BID** located next to the sale you wish to participate in.

New Users

To create an account click **REGISTER**. Fill in your details, then click **CREATE BIDDER REGISTRATION**.

COMMENT

Lot 1: The first Darr Creek Serengeti son to sell this year. Yulgilbar Vice President V008 (PP) is a **homozygous poll** sire prospect that combines outstanding breed character with exceptional balance and undeniable sire appeal. He presents with a clean sheath, quality tropical skin, impressive softness and natural depth, while his exceptional body length and length from hip to pin enhance his overall performance and capacity. Structurally sound and standing on strong bone, he is an easy doing bull with a quiet temperament, offering the functionality and structural integrity demanded by modern breeding programs.

His dam, **Yulgilbar R007 (P)**, has three recorded progeny, all bulls, including a W bull calf weaned earlier this year. Her **first calf sold** in last year's production sale to **SN Beaumont**, highlighting the consistency and commercial appeal of this productive cow family.

A complete, eye catching young sire with the phenotype, practicality and genetic potential to make a lasting contribution in both stud and commercial herds.

COMMENT

Lot 2: Yulgilbar Victorious V090 (PP) is a **homozygous poll** bull, son of Yulgilbar Patriot P034 (P). Victorious has outstanding sire appeal, combining a strong sirey head with excellent breed character and structural correctness. He displays quality tropical skin, a clean tidy sheath, plenty of depth through the body and flank, strong testicular development, and the fleshy, easy doing type sought after by both stud and commercial producers. Quiet in temperament and standing on a sound structure, he is a complete young sire prospect.

His dam, **Yulgilbar R69 (P)**, has three recorded progeny, including a retained U classified daughter now pregnant in the stud herd and a W bull calf weaned earlier this year. R069 has been preg tested back in calf earlier this year, which reflects the strength and consistency of this productive maternal line.

COMMENT

Lot 3: Yulgilbar Venom V012 (P) is a **heterozygous poll** bull with outstanding sire appeal, highlighted by his dark red colour, strong sirey head and attractive hooded eye. Structurally sound and standing on good bone, he combines strength of spine, spring of rib, natural thickness and excellent neck extension to create a powerful, well balanced young sire.

His dam, **Yulgilbar R105 (P)**, has three recorded progeny, including a W bull calf that was weaned earlier this year and she has also preg tested back in calf in the 2026 preg test. While his granddam, **Yulgilbar N253**, has produced six calves in six years, including a W heifer calf that was weaned earlier this year and she has preg tested back in calf. This reflects the fertility and consistency of this productive cow family. A stylish young sire with the phenotype, functionality and pedigree to make a valuable contribution in both stud and commercial breeding programs.

COMMENT

Lot 5: Yulgilbar Vagabond V068 (P) is a **heterozygous poll** bull and the **first son offered by Cardona West Germany W205 (P)**, combining modern sire appeal with outstanding functionality. Deep bodied and naturally thick, he displays exceptional softness, excellent spring of rib, depth of flank and a strong topline, all complemented by an extremely tidy sheath and faultless structural soundness. His balance, mobility and correctness make him a versatile sire capable of fitting into both stud and commercial breeding operations.

As the first calf of **Yulgilbar S023 (P)**, Vagabond offers a combination of phenotype, structural integrity and breeding potential that will suit a wide range of breeding programs.

COMMENT

Lot 6: Yulgilbar Volume V028 (P) is a **heterozygous poll** bull that combines exceptional power with an abundance of softness and natural doing ability. True to his name, he offers tremendous volume, capacity and depth, standing on heavy bone, excellent depth of flank and a strong, sirey outlook throughout. Structurally sound with a quality coat and an exceptionally quiet temperament. He is the **first son offered by Munnabah Quinton 1616 (P)**, making this a unique opportunity to secure genetics from this outstanding sire who is now deceased. A genuine powerhouse with natural grunt that combines performance, softness and structural integrity in a highly desirable package.

Backed by a well balanced EBV profile, Volume brings solid EBV figures across all traits with all **growth traits** in the **top 5%** for the breed **along with his carcass weight**. His **EMA** also sits in the **top 5%**. This good balance of important traits means this bull also ranks in the **top 5%** of the breed for the **Terminal Index**.

 COMMENT

Lot 16: First son offered in this year's sale by Diamond H Yarraman. Yulgilbar Vincent V114 (PS) is a **poll scurred** bull with a powerful, punchy phenotype and exceptional carcase qualities. Dark in colour, he combines natural thickness, softness, a strong topline, good bone and plenty of red meat throughout. Quiet in temperament, he is a practical young bull with genuine performance.

Vincent is the **first calf of Yulgilbar S573**, who has also weaned a W heifer calf earlier this year. To add more value, S573 has also been preg tested back in calf in the 2026 preg test.

Lot 17: Yulgilbar Viggo V120 (P) is a **heterozygous poll** bull with a moderate frame and an early maturing, thick bodied phenotype. Dark red in colour, he combines exceptional carcase traits, a tidy clean sheath, structural soundness and a quiet temperament. An ideal vealer type bull, who offers natural thickness and genuine commercial appeal.

Viggo is the first calf of **Yulgilbar S1602 (PP)**, who has also weaned a bull calf earlier this year and preg tested back in calf.

 COMMENT

Lot 18: Yulgilbar Viper V268, a **Darr Creek Serengeti** son, and is the youngest Yulgilbar bred bull in this year's draft. Viper is a horned bull with exceptional stud sire appeal and potential. Long bodied and heavy boned, he combines tremendous power, natural thickness, depth and softness. He has a strong sirey head, beautiful hooded eye, plenty of loose tropical skin and oozes breed character. He carries exceptional muscle through the hindquarter, with red meat extending down into the lower hind leg.

Viper was the **first calf of Yulgilbar Tilly T33**, who was successfully shown with him as a cow and calf at the 2025 EKKA and later weaned a W heifer calf earlier this year. Unfortunately, Tilly died due to no fault of her own at the end of last year. Viper represents a rare opportunity to secure the genetics of this dam line.

 **COMMENT**

Lot 19: Yulgilbar Volcano V186 is the **first son to be offered** by retained stud sire, **Yulgilbar Sidney S28 (P)**. A **horned bull** with a dark cherry red coat, exceptional quiet temperament and outstanding natural thickness. He combines excellent carcass traits, spring of rib and body length in a clean, tidy and easy doing package.

Volcano is a maternal brother to the successful show female **Yulgilbar Tiffany & Co. T1 (PP)** and is backed by one of the stud's proven donor females.

His dam, **Yulgilbar P019 (P)**, has produced five progeny, including a W bull calf that she has at foot and four of which are all classified. She continues to play an important role in the Yulgilbar IVF program.

COMMENT

Lot 33: Yulgilbar Vegas V108 (PP) is a **homozygous poll** bull with genuine sire potential and is one not to overlook. Practical, well balanced and structurally sound, he combines a tidy sheath, strong bone, attractive colour and a naturally quiet temperament.

Vegas was the first calf of **Yulgilbar T185 (P)**, the full sister to retained stud sire **Yulgilbar Sidney S28 (P)**. T185 was preg tested back in calf earlier this year. His granddam, **Yulgilbar K087 (P)**, has produced five recorded progeny, including Yulgilbar Sidney, whose first sons are offered in this year's production sale.

COMMENT

Lot 44: First son offered in this year's sale by Hardigreen Park Vice Roy N44 (P). Yulgilbar Verdict V290 (P) is a dark red, **heterozygous poll** bull and one of the youngest bulls in the sale. With excellent breed character, depth of body, natural thickness and volume, he is a structurally sound, quiet natured bull with plenty of sire appeal.

Verdict V290 is out of **Yulgilbar N205**, a proven producer of sale bulls, including **Yulgilbar Tick Tick Boom T4 (P)**, who sold to **Brigadoon Cattle Company (Bill Speed)** for \$20,000 in 2024, and **Yulgilbar Uptown U182**, who sold to **JW& M Smith** for \$9,000 in 2025. His granddam, Yulgilbar F181 (P), recorded five progeny.

Verdict is backed by a strong EBV profile with EBV figures in the **top 5%** of the breed for **200 day, 400 day and 600 day growth** and **scrotal size**. His **carcase weight ranks in the top 10%** for the breed which demonstrates that this bull brings high performance in all traits.

COMMENT

Lot 55: Yulgilbar VB V096 (PP) is a **homozygous poll** bull with a larger frame, slick tropical skin and coat, with plenty of natural softness. Deep bodied and later maturing, he combines strong breed character, structural soundness and stands on good bone.

VB V096 is out of **Yulgilbar R225 (P)**, who has three recorded progeny, including a retained U daughter that was classified and pregnancy tested in calf earlier this year, as well as a W bull calf weaned this year. His granddam, **Yulgilbar F055**, has produced seven recorded progeny, including **Yulgilbar Kingsville K118 (P)**, who sold to **Dunlop Santa Gertrudis**.

VB brings solid EBV figures across all traits with **400 day growth** in the **top 1%** and **200 day** and **600 day growth** in the **top 5%** for the breed. **Carcase weight** and **EMA** also rank in the **top 5%** and **10% respectively**. This good balance of important traits means this bull also ranks in the **top 5% for the Terminal Index**.

 **COMMENT**

Lot 61: Yulgilbar Volley V032 is a **horned** bull with a large frame, plenty of length, natural thickness and muscling. Structurally sound with a light sheath, he combines good scale and punch with a practical, functional phenotype.

Volley V032 is out of **Yulgilbar N037 (AI) (P)**, who has five recorded progeny, including a W bull calf weaned earlier this year. All eligible progeny have been classified, including **Yulgilbar Turbine T248 (P)**, who sold to **Ross Grazing Company** in the 2024 sale. Her first calf, **Yulgilbar Sapphire S203 (P)**, was classified and broken in, while her U daughter was pregnancy tested in calf earlier this year. N037 has preg tested back in calf in 2026 preg test earlier this year.

Volley offers a balanced combination of growth and carcass merit with EBV figures in the **top 5% for 200 day growth** and **top 10% for 400 day and 600 day growth**. His **carcass weight** and the **terminal sire index** also rank in the **top 10%** which demonstrates that this bull brings high performance across traits.

PRESCRIBED CONDITIONS OF SALE BY AUCTION

Property, Stock & Business Agents Act (NSW) 2002,
Part 6, s.77 and Regulations 2003.

Clause 18 (1) – The following conditions are applicable to and in respect of the sale by auction of land or livestock:

- (a) The principal's reserve price must be given in writing to the auctioneer before the auction commences.
- (b) A bid for the seller cannot be made unless the auctioneer has, before the commencement of the auction, announced clearly and precisely the number of bids that may be made by us on behalf of the seller.
- (c) The highest bidder is the purchaser, subject to any reserve price.
- (d) In the event of a disputed bid, the auctioneer is the sole arbitrator and the auctioneer's decision is final.
- (e) The auctioneer may refuse to accept any bid that, in the auctioneer's opinion, is not in the best interests of the seller.
- (f) A bidder is taken to be a principal unless, before bidding, the bidder has given to the auctioneer a copy of a written authority to bid for on behalf of another person.
- (g) A bid cannot be made or accepted after the fall of the hammer.
- (h) As soon as practicable after the fall of the hammer the purchaser is to sign the agreement (if any) for sale.

Clause 18 (2) – The following conditions, in addition to the above, are applicable to and in respect of the sale by auction of residential property or rural land:

- (a) All bidders must be registered in the Bidders' Record and display an identifying number when making a bid.
- (b) Subject to subclause (2A), the auctioneer may make only one vendor bid at an auction for the sale of residential property or rural land and no other vendor bid may be made by the auctioneer or any other person.
- (c) Immediately before making a vendor bid the auctioneer must announce that the bid is made on behalf of the seller or announced "vendor bid".

Clause 18 (2A) – the following conditions, in addition to the above, are applicable to and in respect of the sale by auction of co-owned residential property or rural land or the sale of such land by a seller as executor or administrator:

- (a) More than one vendor bid may be made to purchase the interest of a co-owner
- (b) A bid by or on behalf of an executor or administrator may be made to purchaser in that capacity.
- (c) Before the commencement of the auction, the auctioneer must announce that bids to purchase the interest of another co-owner or to purchase as executor or administrator may be made by or on behalf of the seller.
- (d) Before the commencement of the auction, the auctioneer must announce the bidder registration number of any co-owner, executor or administrator or any person registered to bid on behalf of any co-owner, executor or administrator.

Clause 18 (3) – The following condition, in addition to subclause (1), is applicable to and in respect of the sale by auction of livestock:

The purchaser of livestock must pay the stock and station agent who conducted the auction (or under whom immediate and direct supervision this auction was conducted) or the vendor the full amount of the purchase price:

- (a) if that amount can reasonably be determined immediately after the fall of the banner – before the close of the next business day following the auction, or
- (b) if that amount cannot reasonably be determined immediately after the fall of the hammer – before the close of the next business day following determination of that amount, unless some other time for payment is specified in a written agreement between the purchaser and the agent or the purchaser and the vendor made before the fall of the hammer.

Property, Stock and Business Agents Act (NSW) 2002,
section 78 (3) and Regulations 2003, clause 20 (1)

WARNINGS

PENALTY FOR COLLUSIVE PRACTICES

It is an offence against the Property, Stock & Business Agents Act 2002 for a person to do any of the following as a result of a collusive practice, or to induce or attempt to induce another person by a collusive practice to do any of the following:

- (a) to abstain from bidding, or
- (b) to bid to a limited extent only, or
- (c) to do any other act or thing that might prevent free and open competition.

Severe penalties may be imposed on persons convicted of collusive practices.

Property, Stock & Business Agents Act (NSW) 2002,
section 83 (2) and Regulations 2003, clause 20 (2):

SUCCESSFUL BIDDERS

The actual successful bidder at an auction sale must give to the auctioneer or an employee of the auctioneer:

- (a) the bidder's name, or
- (b) the name of the person on whose behalf the successful bid was made.

PENALTY FOR DUMMY BIDDING

It is an offence against the Property, Stock & Business Agents Act 2002 for a person to do any of the following:

- (a) make a bid as the seller,
- (b) make a bid of behalf of the seller (unless the person is the auctioneer),
- (c) procure another person to make a bid on behalf of the seller.

Any bid made with the dominant purpose of benefitting the seller constitutes a bid made of behalf of the seller.

A bid may be found to be a bid made on behalf of the seller even though the seller did not:

- (a) request the bid, or
- (b) have any knowledge of the bid.

Severe penalties may be imposed on persons convicted of dummy bidding.

OCCUPATIONAL HEALTH AND SAFETY

All persons attending the sale are advised by the seller that the sale may involve a risk of physical harm and/or loss. Livestock, machinery, plant and equipment may be offered for sale and each such item has its own inherent risks that persons attending the sale need to appraise themselves of. All persons attending the sale do so at their own risk. All purchasers of items sold are advised that they must ensure, before each such item is removed from the sale, that it is safe and without risks to health when properly used. The seller does not accept any responsibility for any harm, loss or damage whatsoever and that you enter or attend the sale at your own risk. The seller's agent is instructed by the seller to conduct the sale in the manner directed by the seller with items placed out and submitted for sale as directed by the seller. The seller's agent has no control over any items offered for sale and accepts no responsibility for any harm, loss or damage whatsoever and that you enter or attend the sale at our own risk.
