BULL SALE  
CATALOGUE

— 7<sup>th</sup> July 2026 —

Economically proven.....  
predictable, fertile, grass-raised genetics

# ALC Brahmans Breeding Objectives & Focus

ALC Brahmans is focused on breeding adapted, fertile and naturally quiet cattle that deliver a low cost of production and improve profit margins for commercial cattle producers. Our breeding philosophy centres on balanced multi-trait selection to develop functional, efficient cattle that perform profitably across all seasonal conditions.

We aim to produce moderate-framed, structurally sound females with strong fleshing ability and the capacity to maintain body condition in tough environments. This efficiency is reflected in their progeny, producing steers capable of finishing profitably off grass within two wet seasons after weaning. Every bull is selected with one objective in mind — increasing profit per cow exposed and per hectare. While ALC sale bulls consistently rank among the leaders of the Brahman breed for \$ Indexes, it is important to us that these indexes are driven primarily by cow efficiency and functionality, not simply raw growth.

The ALC herd has never been treated for worms or ticks, except when cattle are being cleared for tick-free areas. Our cattle are run under genuine commercial conditions, often exposed to poor nutrition, and have never been fed crop or grain. All sale bulls are presented off grass at rising two years of age in practical working condition. ALC cattle are bred and performance analysed across three distinct regions of Queensland — northern, central and western environments — ensuring our genetics are proven under a wide range of conditions.

Joining commences on October 1 during the dry season, with 45-day joining for two-year-old heifers and 75-day joining for yearling heifers and cows. This system is designed to identify the most efficient and adapted females — those capable of conceiving while lactating under very dry grazing conditions, maintaining pregnancy, calving unassisted, raising a sound calf and rebreeding within a low-cost management system. To remain in the herd, females must wean a live calf at seven to eight months of age and reconceive each year.

---

*Take this opportunity to introduce ALC's internationally proven Brahman genetics into your herd...  
Sale, 7<sup>th</sup> July 2026*

- **Fertile– All cows conceive while lactating**
- **NO freeloaders at ALC... NOT ONE!**
- **ALC demands rapid reproduction every year!!  
...Calving completed by the end of September**
- **Extensive Commercially Significant Data**

- **No Dips, No Sprays, No Drenches-  
Generations of ALC Adapted Genetics**

- **Grass-raised Genetics ... These Bulls will NOT fall  
apart when you get them home...**

- **Fast Fleshing- Rapid Growth!**

**ALC**  
BRAHMAN'S

# Welcome to the ALC Brahmans Annual Bull Sale 2026

From the ALC Brahmans team, we extend our warmest welcome and proudly present our 2026 catalogue of rising two-year-old bulls. Unlike most seedstock operations, all **ALC sale bulls are exclusively grass fed** and run on our lightest country under genuine commercial conditions. No grain or crop is fed, and no chemical treatments are used for ticks, flies or worms. We believe this is the most effective way to identify the true performers — cattle that are naturally efficient, resilient and capable of thriving in Northern Australian environments. Our goal is to produce moderate-framed cattle that grow rapidly and perform profitably under real-world commercial conditions.

**The 2026 sale team averages in the top 5% of the Brahman breed for the Central Production and Live Export \$ Indexes, as well as Scrotal Size and Days-to-Calving EBVs, while also ranking in the top 25% for 600-Day Growth EBV.**

All ALC sale bulls have **passed semen and morphology testing** and have been **DNA parent verified, horn DNA verified** and **fully performance recorded**. The catalogue includes four generations of cow fertility data alongside Group Breedplan EBVs. The entire ALC herd is recorded on Brahman Breedplan, with very high accuracy EBVs achieved through generations of performance recording dating back to the inception of Breedplan in the late 1980s. To ensure complete transparency, we provide the raw performance data on every bull, complemented by genomic analysis. Performance information submitted annually to Breedplan includes 200, 400 and 600-day weights, 400-day scrotal circumference, mature cow weights, joining records, progeny birth dates and **genomic analysis** of all male calves.

Increasing the proportion of **polled** cattle within the herd has also been a major focus over the past decade, with results continuing to compound. Today, 49% of active ALC breeders are polled, while 68% of the 2026 sale team carry these genetics.

**Fertility and early puberty remain central to our breeding program.** In the 2026 sale team, 63% of bulls are out of females that calved at two years of age, while 83% are from two-year-old calving dams or grand dams. We are extremely proud of the progress made in advancing early puberty genetics without sacrificing growth performance. While joining Brahman females to calve at two years of age has traditionally been uncommon, ALC is proving it can be achieved successfully under commercial conditions. ALC Brahmans yearling heifer pregnancy results have been steadily improving from 64% in 2022 to 82% in 2026, with no supplementation. This applies pressure to the first two re-breeds.

Buyers may notice some longer **calving intervals** within the catalogue. Females that calve at two years of age, are allowed one miss as a three-year-old but are **never** permitted another miss thereafter. Three-year-old calving females are not allowed to miss at all. We believe that a Brahman female calving successfully at two years of age, even if she misses once at rebreed, is still more profitable and productive than a later maturing female that first calves at three years old. Importantly, our rebreed rates in two-year-old calvers consistently range between 65% and 85% pregnant.

We feel privileged to supply highly fertile, adapted and naturally quiet genetics that make a genuine difference in our clients' herds, particularly in challenging environments. Please feel free to contact us to discuss the performance data we provide, or to identify which bulls may best suit your operation.

**Alf's mobile - 0438356050. Louise's mobile – 0458356177.**

Thank you for your interest and support, Alf, Louise and family.

## SALE INFORMATION

**Sale format**—Please be sure to read the page “Helmsman Bid System” for sale format.

**Bidding**— Buyers can bid online via AuctionsPlus or onsite at “Gundaroo”, Nebo QLD. For more information about bidding via AuctionsPlus, go to the ‘Bull Sale Page’ of ALC Brahmans website.

**Refreshments**—Morning/afternoon tea and lunch will be available on sale day provided by ALC Brahmans.

**Injury to Person or Property**—All persons who attend the sale do at their own risk and the vendors assume no liability or responsibility, legal or otherwise, for any accident or injury which may occur.

**Tick treatment**—All sale bulls have been pre-treated prior to sale, in preparation for tick clearing. ALC will organize tick clearing if required.

**Vaccinations**—Sale Bulls have been given Botulism and 3-day shots.

**Semen & Morphology Tested**—All sale bulls have passed a semen & morphology assessment.

**Guarantee**—If a bull is unable to perform natural service within 6 months of purchase, (excluding injury, neglect or illness), the purchaser must provide a vet certificate. ALC will then offer a suitable replacement if one is available. Alternatively, ALC will refund the purchase price minus the salvage value.

**Delivery**—ALC will organize bull delivery and coordinate joint loads where possible. ALC will provide free delivery to Tondara Station, Gumlu, Clermont, Emerald, Gracemere and in between. All bulls personally delivered by ALC as a complementary service, will be NLIS transferred to the buyers PIC. The freight cost and responsibility of NLIS transfer of bulls trucked via a hired carrier, lies with the purchaser. ALC is not responsible for bulls in transit. No bulls are insured; however new owners are welcome to take up insurance from sale date if so desired with a company of their choice.

---

## TERMS AND CONDITIONS OF SALE

- ALC will invoice clients after the sale and terms for payment will be 30 days from sale date.
  - Bulls are sold as herd bulls (un-registered) unless arranged otherwise prior to the auction commencing at 10:30am. If you are a stud enterprise, please mention this to Louise prior to the sale or upon arrival on sale day, and you will be given further information regarding possible adult or commercial registration and transfer of ownership of bulls.
  - All semen rights remain solely with ALC Brahmans.
- 

We look forward to talking with everyone on sale day.

ALC Brahmans: - Alf, Louise, Heath, Tom & Ellie Collins

# The benefits of using ALC Brahmans Genetics in your herd

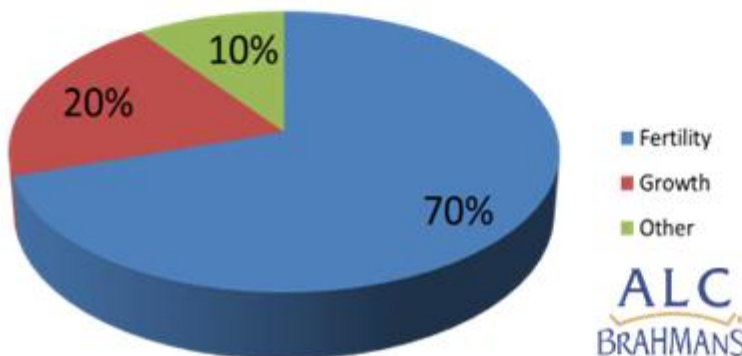

## Selection generates change

## ALC Brahmans Facts:

- 49% of the active ALC Breeders are Polled or Scurred and 68% of the 2026 Sale team are.
- 63% of the bulls in the 2026 ALC Bull Sale team are out of two-year-old calving Dams and 83% are out of two-year-old calving Dams or G.Dams.

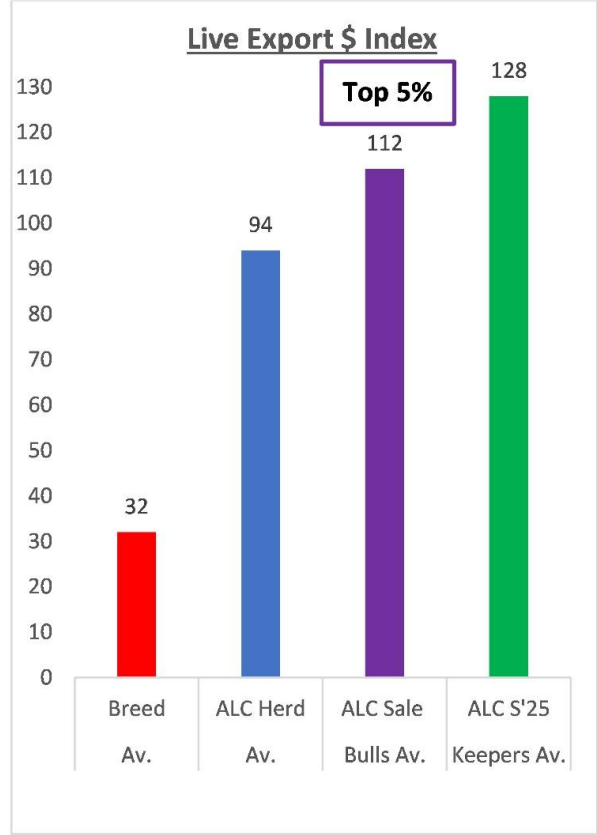

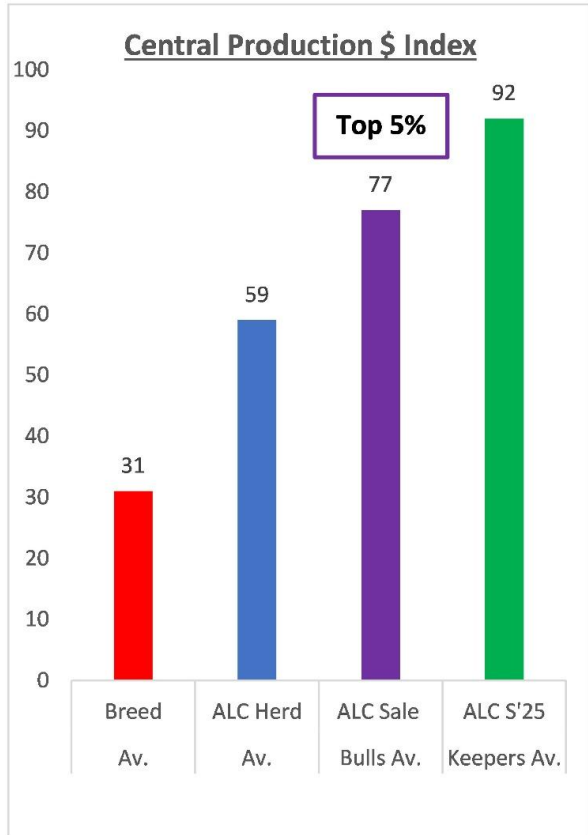

## Key traits that drive profit in a beef herd

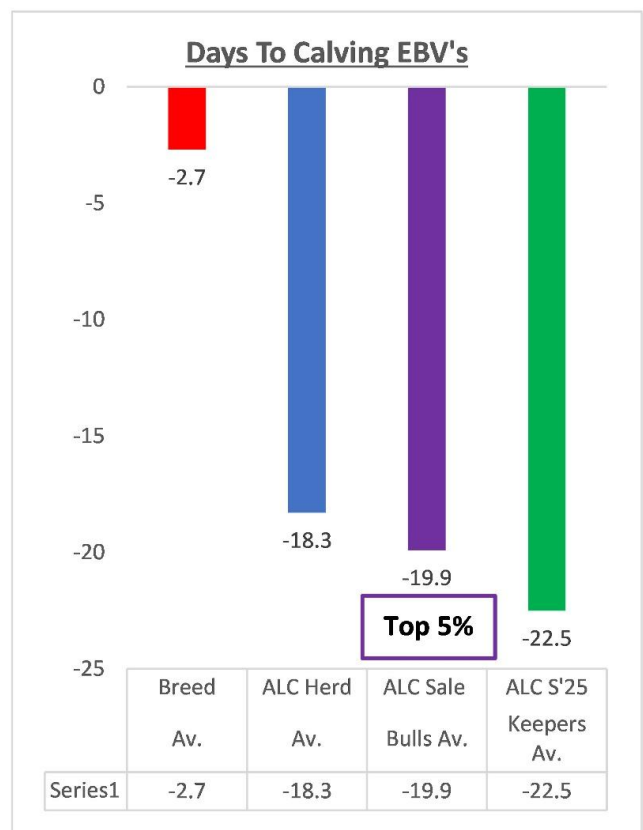

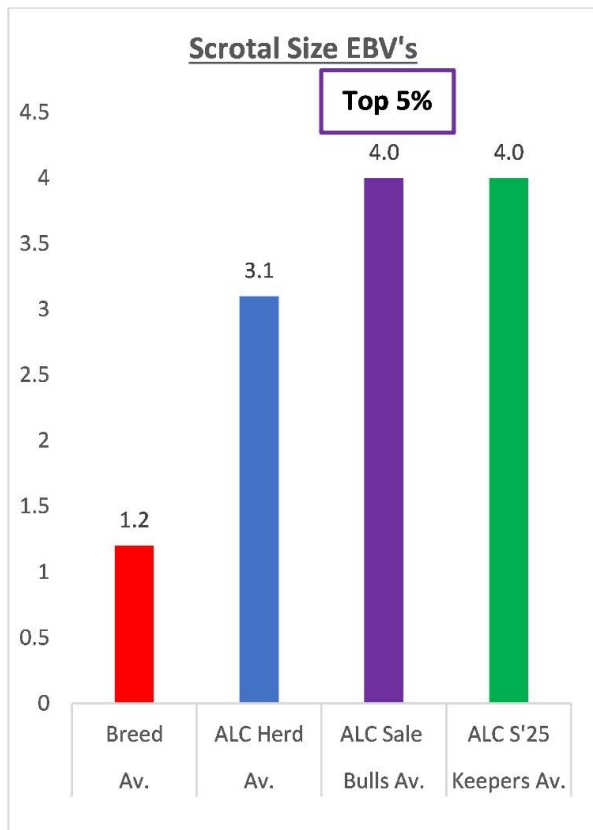

- Yearling heifers pregnancy test result this year was 82% pregnant.
- All cows are joined for a total of 10 weeks, while lactating - most years before rain. This applies maximum pressure, allowing us to retain only the females that work regardless of the season.

## HELMSMAN BID SYSTEM

This method of buying bulls combines the good features of both the auction system and sale by private treaty. You get the opportunity to bid on and buy any bull in the offering and you pay competitive market value without any pressure.

### HOW IT WORKS

1. On arrival, make your way to the bid registry table to register to bid and receive a buyer number, catalogue and bidder cards.
2. All bulls are displayed for inspection as usual, with relevant information provided in the catalogue.
3. When the sale commences, all bulls are on the market simultaneously. You may bid on any bull, regardless of lot number, by filling in a card and handing it to a 'runner'.
4. You may open the bidding from 10:30am according to the opening pen price as displayed. Further bids in multiples of a minimum bid amount of \$1,000 will be accepted. There is no limit on the size of bid.
5. Bids are recorded with the buyer's number on a large board adjacent to the bull display area. You can bid on any number of bulls and can see at a glance whether your bid still stands or has been overbid.
6. There is no pressure to commit to another bid. If your first choice bull goes over your limit, you can still bid on any other bull on sale. A bid once submitted and recorded cannot be retracted, and the person responsible for submitting such a bid will be responsible for it until it is overbid.
7. All bulls are for sale simultaneously for the duration of the sale. **Bidding from 10:30am to 12 O'clock will happen with no timer countdown in place.** This gives buyers plenty of time to walk back through the pens of bulls, whilst analysing the data supplied, without pressure.
8. Lunch will be offered from 12 O'clock to 12:30pm. No bids will be accepted during this time.
9. **From 12:30pm** the sale will recommence in simultaneous bid format still, however a **timer countdown will be in place.** The clock will start at 2 minutes, then after some time will reduce to 1 minute then 30 seconds. If any bull is bid on during a specific countdown timeframe, the clock is then restarted for that countdown timeframe. If no bulls are bid on during any allocated countdown timeframe, then the sale is officially closed.
10. The sale is anticipated to conclude by 1:30pm. This format would therefore mean that **all** bulls lotted will be open for bidding until sale closure which is determined by the timer countdown system.
11. The sale is interfaced with AuctionsPlus, with the Helmsman system meshing perfectly with the simultaneous online auction in real time.

### THE BENEFITS

1. You have more time to consider lodging a bid. You can place genuine bids on any bull of your choice at any time during the sale period.
2. You have the opportunity to re-assess each lot during the sale period without any pressure to make an instant decision.
3. You have the opportunity to take home the bulls you want, irrespective of where they are positioned in the catalogue. For example, having been out-bid on the bull of your first choice, you can move back to your second choice bull positioned anywhere in the catalogue.
4. When you are buying multiples or groups of bulls, Helmsman gives you flexibility and time to average your purchase costs.

**The principle of ALC genetics management is to report all data from our whole herd, to our clients and potential clients. Our aim is to have the most important data in nett commercial terms, readily available, in easy to read format.**

In most regions of the commercial beef-raising world the important profit index ranks as follows for every \$10 margin:

- \$7 earned by good reproduction
- \$2 earned by live weight growth
- \$1 earned by other traits (carcase, colour, temperament etc)

The ALC herd stems from four decades of intense selection in the traits of **fertile, gentle** and **growthy** cattle **adapted** to our Northern Australian costs and conditions. Four traits are plenty to select for.

- **Fertility** and **adaptation** may end up meaning the same thing.
- **Good temperament** is essential for low costs in labour and facilities, and minimising market losses.
- **Growth** usually equals consumption, so there is literally no free feed there, in normal Northern Australian conditions. The most elusive factor is adequate groceries for our herds. You can equate this in several ways, eg. stocking rates per square mile, stock days per hectare per 100mm of rain, or acres to the beast. All of these have an equivalent *dollar cost*, whether on your own country or on agistment. Quantity and distribution of rainfall has a big impact on our costs each year also.

SO LET'S FOCUS ON THE REAL STUFF.

**Fertility and adaptation...** we can use the simple fertility measures of pregnant or empty, and weaned a calf or lost a calf or pregnancy. This criteria of pregnant must fall in a set period, or we would be hiding behind excuses forever. Similarly, a weaner in the yard, or no weaner is pretty final judgement too. For every year of ownership, any less than a calf weaned plus a pregnancy is simply not an option. They are then proven adapted cows. We provide very transparent data on all Dams, Grand Dams, Great Grand Dams and Great Great Grand Dams of our ALC sale bulls.

Lot #	Bull #	Pen	Col.	Cat.	DOB	Horn DNA	Pub. Age	June Wt	June SC

14-0887	12-0272 (1C)		2.8	10	373	27	29	42	1.1	-4.5
08-6039	08-6124 (1D)		2.8	5	393	24	30	44	0.2	-8.1

Note: the coloured figures represent the top 1% 5% 10% 30% for the brahman breed .

1. (1A) is the Dam, (1B) is the G.Dam, (1C) is the G.G.Dam and (1D) is the G.G.G.Dam of the sale bull.
2. PT result in weeks from April pregnancy test.
3. Age at first calf.
4. Number of calves born.
5. Subsequent calving interval in days.
6. Days to Calving EBV (DTC) is an indicator of female fertility based on the time between a cow's first exposure to a bull and when she subsequently calved.
7. Bulls are penned in groups of 15 to 20 head. Pens are labelled on the gates. For example, a grey A\* sale bull marked Lot # 6 would be found in the pen labelled "PEN GY-A\* LOTS 1-15".
8. Sale bulls are categorized as categories A and A\*. Category A\* being what we consider to be the lead of the sale bulls.
9. All bulls have been DNA verified as either HH – Horned, HPC- Heterozygous Poll (both clean headed and scurred/buttons) or PcPc - Homozygous Poll (animal sires polled progeny only). Please note, some HPC scurred animals were snipped at branding and some were not.
10. Age in months at puberty.
11. Kg live weight in June.
12. Testicle scrotal circumference (SC) in June.
13. Estimated Breeding Values (EBV's) for growth at 200, 400 and 600 days of age along with scrotal size (SS), days to calving (DTC), Central Production \$ index (CPI) and Live Export \$ index (LEI) from Breedplan June run.
14. Accuracy of the EBV as a percentage - based on the amount of performance data submitted on the animal and its close relatives. The higher the accuracy, the higher the estimate of the animal's true breeding value.
15. A percentile for an EBV, shows exactly where an individual animal ranks, compared to the rest of the breed. It translates genetic potential into a simple ranking, from the top 1% (first percentile) to the bottom 99% (99th percentile).
16. Breed Average EBVs for 2024 born animals, from the June Breedplan EBV run.

**Production and genetic information for all sires is also provided.**

Almost all of this data is related to speed of production driven by reproduction indicators. ALC bulls are priced accordingly. Please contact us direct for further discussion and sale bull data.
